DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-19** are allowed.
2. The following is an examiner's statement of reasons for allowance: Matena et al. teaches a method and apparatus for executing applications on a distributed computer system. The prior art of record does not teach high availability system further comprising a secondary node running a redundant middleware stack for mirroring the plurality of layers of the middleware stack of the primary node, wherein a first selection of the plurality of layers of the redundant middleware stack are active and a second selection of the plurality of layers of the redundant middleware stack are in standby.

The prior art of record also does not teach a cluster management controller for monitoring a status of the primary node of the high availability system and responsive to the status indicating an error, transferring the virtual IP address from the primary node to the secondary node, turning off power to the primary node, remounting the data replication partition for access by the secondary node, and activating the second selection of the plurality of layers of the redundant middleware stack requiring access to the data within the data replication partition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
